## SUMMARY

Full stack web developer leveraging skills in team environments to quickly and creatively solve problems in web development. Earned a certificate in full stack web development from the University of Wisconsin in November of 2022, with newly developed skills in JavaScript, HTML, CSS, MongoDB, MySQL, the MERN stack, and responsive web design. Known as a quick learner with a strong work ethic, and enjoys picking up new skills and applying them to develop and debug web applications. Have applied development skills to build several interactive applications as the sole developer, and worked with a team of six to build an interactive fullstack project that helps people choose style templates for a project. Excited to leverage skills as part of a quality-driven team to build better experiences on the web.
